EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Carlton H. Hoel on 28 October 2004.

The application has been amended as follows:

a.) On page 1 of the specifications, under Cross-Reference to Related Applications; in line 2, replace "60/.....filed ..." with 60/174, 511. Delete the remaining sentences beginning with "The following patentapplication."

b.) In claim 1, line 1, replace "Claim 1" with "1.)".

c.) In claim 2, line 1, replace "Claim 2", with "2.)".

d.) In claim 3, line 1, replace "Claim 3" with "3.)".

e.) In claim 4, line 1, replace "Claim 4" with "4.)".

f.) In claim 5, line 1, replace "Claim 5" with "5.)".

g.) In claim 6, line 1, replace "Claim 6" with "6.)".

h.) In claim 7, line 1, replace "Claim 7" with "7.)".

i.) In claim 8, line 1, replace "Claim 8" with "8.)".

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The present application discloses a method for performing time tracking of two or more paths of a spread spectrum signal in a spread spectrum communications receiver. The prior art fails to disclose such a method comprising; "determining whether any of said distance is smaller than one element of said spread spectrum code, and changing' the separation between early and on-time, and late and on-time instances if any of said distances in (b) is smaller than one element of the spread spectrum code » as disclosed in steps b and c of claim. The prior art also fails to teach "determining whether any of said distances is smaller than one element of said spread spectrum code; and disregarding updates of said time tracking unit corresponding to the path having smaller power than the other path if any of said distances in (b) is smaller than one element of the spread spectrum" as disclosed in steps b and c of claim 2. the prior art also fails to teach "determining whether any of said distances is smaller than one element of said spread spectrum code, and disregarding updates of said time tracking unit corresponding to the path having smaller power than the other path if said updates make the distance between the "on_ time" instances of the two paths less than one of said code element" or "determining whether any of said distances is smaller than one element of said spread spectrum code; measuring the power of said paths; and evaluating and subtracting, based on said distances and power of said path, the contribution of each path on the statistic value of said early, and/or said on-time, and/or said late instance of the other path" as disclosed in claims 5 and 8, respectively..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
